Projects

- **Portfolio Website**

Design & Development

- Built an ever-expanding website from scratch using JavaScript, ReactJS, CSS, and HTML to display who I am, and the software development projects that I have worked on.
- The website is currently hosted at julianlopez6850.github.io via Github Pages.

- **NuMom**

Lead Developer, Scrum Master

- Continued development and bug-fixing of a mobile app, built with JavaScript and React Native, alongside other FIU students for 2 semesters, using the Scrum development framework.
- Led, as Scrum Master, a 10-member team throughout my second semester with NuMom.

- **VINYLE**

Design & Development

- Built a web app, similar to Wordle, that retrieves album info from a database and shows cropped portions of its art for users to guess, using JavaScript, ReactJS, NodeJS, ExpressJS, and MySQL.
- Created a complementary web app to request album info from the Spotify API to add to my database.

- **Aliens Took My Friend**

Co-Design & Development

- Developed a short space-themed adventure game using Unity, and programmed in C#, for KnightHacks 2021 within a 36-hour timeframe with a teammate.
- Awarded Best Space App, sponsored by the United States Space Force.

* More information regarding my projects can be found at my portfolio website, linked above.
